

Team Kiwi – Playlist Party
Startup 03 Report

There are no current bugs to report.

Components

- searchResults – renders list items for the search results page
- createPlaylist – renders the list items for the create playlist
- accountOverview – renders the table that contains a user's account information
- mainDashboardMusic – renders the song items for a given playlist
- mainDashboard – renders subcomponents to the main dashboard
- mainDashboard/navbar – renders logo and two subcomponents: leftitems and rightitems
- mainDashboard/navbarleftitem – renders the search bar on the navbar
- mainDashboard/navbarrightitem – renders the buttons on the navbar
- mainDashboard/sidebar - renders the subcomponents: sidebarheader,
, sidebarlist, and sidebar footer
- mainDashboard/sidebarfooter – will render buttons on the sidebar when implemented
- mainDashboard/sidebarheader – renders the create playlist button
- mainDashboard/sidebarlist – renders the entire list of the sidebar
- mainDashboard/maintable – renders main table from tablebody & tablehead
- mainDashboard/tablebody – contains tableitem components, each consisting of a song with artist information
- mainDashboard/tablehead – contains basic playlist information such as name and user.
- mainDashboard/tableitem – contains song, artist, album and upvote information
- mainDashboard/musicplayer – music player that appears by mouseover at the bottom left of the main panel

Group Participation

- Michelle Ko – Created the initial draft of the framework for the static searchResults page.
- Jake Magier – worked on searchResults: created css, fixed formatting and added additional buttons, edited original searchResults.html to work with React components.
- Nick Cummings – added react elements to accountOverview.
- Sam McGuire – worked on turning mainDashboard and mainDashboardMusic HTML files into Javascript, in particular the main table that provides playlist info
- Jonathan Bailey – Converted the HTML of the navbar and sidebar of mainDashboard and mainDashboard music into all of the related components and subcomponents (navbar, navbarleftitem, navbarrightitem, sidebar, sidebarheader, sidebarlist, sidebarfooter)
- Dominic Carnevale – Worked on turning the Create Playlist page into React, wrote this report, and helped other group members debug their issues.

No features are being cut at this point.
